## Forest Fires—Our Most Shameful Waste

Everyone apparently fears fire but too many are careless with it. This is particularly true of fires in and near woodlands. Official figures show that more than 98 percent of all forest fires result from human carelessness and can be prevented. Consequently, we may say "Forest Fires are our most shameful waste."

Our forest fire organization is doing a good job in keeping the size of fires small, but the number of fires is increasing. In 1949 there were 100 more fires in New Hampshire than in 1948, but they burned 500 acres less. For the warden and his deputies to do the job they are capable of, they must have the cooperation of the public—YOU!

The primary objective of all fire fighters is PREVENTION—fire stoppage. This is the goal toward which your local forest fire warden and his deputies are constantly working. It can be achieved ONLY if YOU and YOU and YOU cooperate with them. It is worth YOUR effort and can be accomplished by:

1. Being careful with fire in or near woodland, being particularly careful with matches and cigarettes.
2. Securing the required written permit from the warden when the ground is not covered with snow.
3. Insisting that others be careful and comply with burning requirements.
4. Calling the warden promptly when fire is detected and aiding him to extinguish it.

Let's reduce the number of forest fires and eliminate our most shameful waste.

## B. ADMINISTRATIVE POLICY

The administrative policy adopted this year to employ the same person as Music Supervisor for Peterborough, Jaffrey, Dublin and Hancock is making for a much better coordinated program in music. It is economical of the superintendent's time to confer with one person rather than two or three in working to develop a program of high quality, and it is possible to bring the various groups together for pleasurable joint participation.

Another policy that is receiving favorable comment is that of bringing the two schools closer together, both faculty and student body. Examples: (1) There is developing a spirit of oneness in the management of and participation in the lunch program; (2) efforts are being made to share some instructional materials and programs, and (3) plans are developing toward the use of the high school gymnasium by the grade school pupils for junior athletics.

### B. PROGRAM AND METHODS

One of the most important subjects of study offered in our schools is that of reading and it is without doubt the most difficult to teach. In order to help teachers to acquire higher skill in this tremendously vital area all teachers of the Supervisory Union worked for five full school days (Nov. 7-11) under highly expert leaders from Boston University. The activity

was officially called a workshop, and it truly was. Doctors Durrell, Murphy and Sullivan gave as fine a course as could possibly be desired. There wasn't a dull moment from start to finish and all teachers have reported a very helpful experience. The teachers paid one-fourth of the total cost of the course and the school districts shared in meeting the balance of the expenses.

Mrs. Dalton and Mr. Filbin encourage normal growth in concepts and ability to express.

### PART III. SCHOOL PLANT

During the past summer the toilets at the elementary school were moved from the basement onto the first floor, a much better location from the point of view of convenience in use and ease of supervision.

Another decided improvement was made by partitioning off a portion of the front hall for an office and health room.

To help correct the loss of play facilities caused by equipment wearing out a new junglegym has been installed this fall. This is proving very popular with all ages.

The greatest major need now appears to be the replacement of the worn-out heating system. The present equipment is probably near collapse. Estimates have been received and an article appears in the warrant to permit action on this matter.

## REPORT ON HEALTH EXAMINATIONS—HANCOCK— 1949-1950

A combination health service and teacher's room was made during the summer in the Elementary School, providing welcome privacy and quiet and a cabinet was built to house First Aid equipment.

In the High School a small space in the girls toilet large enough for a couch and some shelves has been enclosed. Inadequate as the space is, it does provide a place where a sick student can lie down.

The Hancock Womans Club has presented the School Department with equipment for health service in both schools. This has already proved its value.

Respectfully submitted,

FREDRIKA MOORE, M.D.  
School Physician
